SUMMARY

Software developer with professional experience since 2021. I currently work as a product developer at Audiense, practising TDD and XP boosted by AI.

PROFESSIONAL EXPERIENCE

Product Developer, Audiense

February 2023 — Present

- I develop product for an application that analyses aggregated social media data. I work on the front end, back end, ETL and platform.
- I built an internal tool that saves €30,000 a year.

Software Developer, Lean Mind

March 2021 — January 2023

- In 2021 I had the honour of joining Carlos Blé's team, a software development and consulting company based in Tenerife. At Lean Mind I had the chance to work and learn in high-performing teams focused on Agile methodologies.
- I optimised and built ETL processes and developed a commercial blog.
- There I learned a lot about good development practices, code maintenance and testing with TDD.

EDUCATION

Full Stack Bootcamp, Escuela de Organización Industrial

September 2020 — February 2021

- Completed the 5th edition of EOI's Full Stack Programming Course, led by ManzDev.

Higher Technician in Multiplatform Application Development (DAM), CFP César Manrique

2018 — 2020

- Higher vocational training at CFP César Manrique, Santa Cruz de Tenerife.

TECHNICAL SKILLS

Backend and data: Node.js, TypeScript, Express, MongoDB, MySQL, AWS S3 and SQS, Google Cloud Storage, Zod, OpenTelemetry
